# About Us

HIPPO BOND INDUSTRIES LLP is a progressive and innovative brand committed to delivering high-performance solutions for the modern construction industry. Our product portfolio covers adhesives, grouts, and waterproofing systems—all designed to meet the highest standards of durability, functionality, and visual appeal.

We understand the diverse challenges faced by today's builders, architects, and contractors. That's why our formulations are engineered not just for performance, but also for ease of application, compatibility with a wide range of surfaces, and long-term reliability. Trusted across residential, commercial, and industrial segments, HIPPO ensures your projects stand the test of time with quality you can rely on.

## Vision

To be the most successful and respected industrial specifically construction chemical company in India

## Mission

Partner actively with our customers to provide innovative and sustainable technical solutions to help them increase productivity and reduce cost.

## Why Choose HIPPO BOND?

- **Advanced polymer technologies** for superior strength and flexibility.
- **Engineered for Indian conditions**—heat, humidity, and heavy load bearing.
- **Comprehensive range:** adhesives, tile grouts, waterproofing, block mortars & more.
- **Time-saving & easy-to-apply** products that reduce on-site errors.
- **Preferred by professionals**—from architects to contractors across India.
- **Expert technical support** for product guidance and project success

# Product Details

## H-1 Easy Fix

### Description:

A ready-to-use polymer-modified cement based high performance, high strength, high quality tile adhesive developed to fix all types of tiles in floor tile application suitable for internal thin-bed applications.

### Features:

- Pre-mixed ready-to-use paste
- Designed for fixing ceramic, vitrified tiles
- Easy to apply no mixing required
- Water cleanable & non-toxic

### Advantages:

- Saves time and labor
- Thick & thin bed applications
- Economical & easy to use
- Perfect for interior tiling work

Packaging Units : 20 kg.

Coverage: Approx. 5-6 m<sup>2</sup>/20 kg bag at 3mm bed thickness.

Application Areas: Bathrooms, kitchens, wall tiles, small repairs.

## H-2 Tile Fix

### Description:

A cement-based, polymer-modified adhesive designed for fixing ceramic and vitrified tiles on floors and walls. It provides strong bonding and workability suitable for both residential and commercial applications.

### Features:

- Excellent bond strength
- Tile on tile applications
- Easy to apply no mixing required
- Low Shrinkage

### Advantages:

- Single component, ready to use
- Self curing
- Good open wet time
- Perfect for interior tiling work

Packaging Units: 20 kg.

Coverage: Approx. 5-6 m<sup>2</sup>/20 kg at 3mm bed thickness.

Application Areas: Tile on tile, Bricks, Cladding.

## H-3 Stone Fix – Grey

### Description:

High-performance grey tile adhesive used for fixing granite, sandstone, and other heavy-duty natural stones. Ideal for demanding flooring and wall applications.

### Features:

- Strong bond strength
- Grey cement base
- Polymer-modified formula
- Water and heat resistant

### Advantages:

- Durable for heavy tiles and stone
- Ideal for both vertical and horizontal surfaces
- Suitable for large format stones

**Packaging Units:** 20 kg.

**Coverage:** Approx. 5-6 m<sup>2</sup> / 20 kg at 3 mm bed thickness.

**Application Areas:** Granite, sandstone, stone cladding.

## H-3 Stone Fix – White

### Description:

Specially developed white adhesive ideal for fixing natural stones and light-colored marbles without staining. Its non-shrink and polymer-enriched formulation ensures maximum strength and a clean appearance.

### Features:

- Strong bond strength (add bullet point)
- Non-staining formula
- Polymer modified for flexibility
- Moisture resistant

### Advantages:

- Prevents discoloration of stones
- Strong hold for vertical & horizontal applications
- Excellent for aesthetic finishes

**Packaging Units:** 20kg.

**Coverage:** Approx. 5-6 m<sup>2</sup> / 20 kg at 3 mm bed thickness.

**Application Areas:** White marble, natural stone, interior/exterior.

## H-4 Ultra Fix – Grey

### Description:

Formulated for fixing heavy tiles and stones in high-load and moisture-prone areas. Specifically designed for all type of heavy tiles, natural stone on external floors & walls.

### Features:

- Heavy-duty grey tile adhesive
- High bond and slip resistance
- Weather durable
- Extended workability

### Advantages:

- Perfect for commercial installations
- Long open time for large format applications
- Reliable in wet and dry conditions

Packaging Units : 20 kg.

Coverage: 5 to 6 m<sup>2</sup>/20 kg bag at 3mm bed thickness

Application Areas: : Industrial floors, large tile installations.

## H-4 Ultra Fix – White

### Description:

A premium white adhesive for large format tiles, vitrified tiles, and glass mosaics. Offers superior strength, flexibility, and clean aesthetic finish.

### Features:

- Extended open time
- High polymer content
- Water & weather resistant
- Flexible bonding for large surfaces

### Advantages:

- Ideal for delicate and high-end surfaces
- Prevents cracks due to substrate movement
- Superior finish with no discoloration

Packaging Units: 20kg.

Coverage: 5 to 6 m<sup>2</sup>/20 kg bag at 3mm bed thickness

Application Areas: Facades, pools, vitrified tiles, stone tiles.

# H-12

# Block Fix

### Description:

Thin joint mortar designed for joining AAC (Autoclaved Aerated Concrete) blocks. Reduces thickness, improves speed and accuracy of masonry work.

### Features:

- Pre-mixed dry mortar
- Thin joint technology (3 mm)
- Quick setting and high strength
- Excellent adhesion

### Advantages:

- Reduced material wastage
- Faster construction speed
- Uniform bonding with clean finish

Packaging Units : 40kg

Coverage: Approx. 140/150 sq.ft/40 kg bag for 3 mm joints.

Application Areas: AAC block walls, partition walls.

# HP-100 Hipoxy Grout

### Description:

A three-component, chemical-resistant epoxy grout for tile joints. Ideal for areas requiring high hygiene and stain resistance.

### Features:

- Anti-bacterial & anti-fungal
- Stain, chemical, and water-resistant
- Excellent abrasion resistance
- Color stable

### Advantages:

- Best for commercial kitchens, hospitals
- Long-lasting and easy to maintain
- Suitable for interior and exterior use

Packaging Units : 1kg, 5kg, 20 kg

Coverage: Varies by joint size approx 0.2-0.3 kg/m<sup>2</sup>

Application Areas: : Bathrooms, hospitals, swimming pools, industrial kitchens.

# H-10 Multi Fix PU Adhesive

## Description:

Flexible, moisture-curing polyurethane adhesive for bonding multiple materials like wood, metal, concrete, tiles, and composites.

### Features:

- Superior flexibility
- Two components just mix & use
- Fast curing
- Bonds dissimilar surfaces

### Advantages:

- Good open and Adjustability time
- Water-resistant
- Can be used in interior & exterior conditions

Packaging Units: 4 kg.

Coverage: Approx. 4-5 m<sup>2</sup>/kg depending on surface.

Application Areas: Wood panels, tile fixing, construction joints.

# H-11 Cement Polymer Grout

## Description:

Polymer-enriched cementitious grout designed for tile joint filling with good water repellence and anti-fungal properties.

### Features:

- Smooth finish with color stability
- Polymer-modified
- Easy application and cleanup
- Crack resistant

### Advantages:

- Suitable for internal & external use
- Prevents water seepage and fungus
- Available in various colours

Packaging Units: 1 kg / 10 kg

Coverage: Depends on tile and joint dimensions.

Application Areas: : Floor and wall joints, kitchens, bathrooms, balconies & swimming pools

# H-13 Flexi Guard 2k cementitious waterproofing

## Description:

A two-component waterproofing system combining powder and liquid polymers to form a tough, breathable membrane ideal for high-moisture

### Features:

- Excellent bonding to concrete
- High flexibility and durability
- Easy to apply with brush or roller
- Protects against water ingress

### Advantages:

- Suitable for both positive & negative pressure areas
- Resists salt, moisture, and efflorescence
- Compatible with tile adhesives for top tiling

Packaging Units : 15 kg.

Coverage: Approx. 1.8–2 m<sup>2</sup>/kg in 2 coats.

Application Areas: : Basements, bathrooms, water tanks, balconies.

# H-14 Lasting Guard Waterproofing Membrane

## Description:

An elastomeric, liquid-applied waterproofing membrane that forms a seamless, flexible coating over surfaces to prevent water seepage

### Features:

- UV resistant and weatherproof
- Excellent crack-bridging ability
- High flexibility
- Seamless membrane finish

### Advantages:

- Prevents water damage in structures
- Long-lasting protection with minimal maintenance
- Easy application via roller or brush

Packaging Units: 1kg, 20kg

Coverage: Approx. 1.5–2 m<sup>2</sup>/kg in 2 coats

Application Areas: Roofs, terraces, balconies, wet areas.

# H-15 S.B.R

## Description:

A styrene-butadiene rubber-based liquid admixture and bonding agent for concrete and mortar. Designed to improve adhesion, water resistance, flexibility, and strength. It is ideal for waterproofing, repair, and protective coatings on old or new surfaces.

## Features:

- Strong bond to old & new surfaces
- Improves waterproofing
- Reduces shrinkage & cracks
- Enhances strength & flexibility

## Advantages:

- Long-lasting protection
- Multipurpose use
- Works in interior & exterior areas
- Resists fungus & microbial growth

Packaging Units: 1kg, 5kg, 20kg

Coverage: 4-5 m<sup>2</sup>/kg (two coats, varies by surface)

## Application Areas:

- Roofs, bathrooms, terraces
- New-to-old concrete bonding
- Concrete & masonry repair
- Steel reinforcement protection
