

## HIPPO Bond Unsanded Polymer Grout

HIPPO Bond Unsanded Polymer Grout is a water-resistant cement based tile joint filler developed to provide long-lasting, water-resistant joints in wall and floor tiles. It levels easily, sets hard, and creates a clean, dust-free surface.

### AREAS OF APPLICATION

Suitable for bathrooms, kitchens, and both internal and external tiled surfaces. Best for joints up to 5 mm width.

### FEATURES

- High compressive, tensile & flexural strength
- Water-resistant finish
- Easy application and maintenance
- Available in 10 attractive shades

### BENEFITS

Water-resistant tile joints

Easy to clean

Durable and strong finish

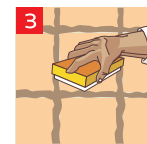

### HOW TO USE

1 Mix 3 to 3.5 parts HIPPO Unsanded Tile Grout with 1 part water by volume to achieve a smooth paste

2 Apply using a rubber trowel

3 Remove excess grout with a damp sponge

4 Let the surface cure for at least 24 hours

Dreams come true!

## HIPPO BOND HIPOXY GROUT HP-100

HIPPO Bond Hipoxy Grout is a premium-grade epoxy grout designed to deliver a clean, seamless finish for tile joints. Built to resist stains, water, and chemicals, it's ideal for high-moisture environments like kitchens and bathrooms.

### AREAS OF APPLICATION

Perfect for tiled areas prone to moisture - including wet zones between tiles, stones and other surfaces, particularly in areas with high moisture or chemical exposure

### FEATURES

- Smooth, easy-to-mix formulation
- Simple cleanup with a damp sponge
- Reinforces tile joints while preserving aesthetics
- Comes in a vibrant, durable shade range

### BENEFITS

Crack-free joints

Strong resistance to stains & acids

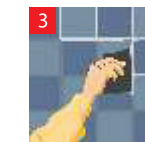

Long-lasting water protection

1 Combine resin and hardener as instructed

2 Gradually add filler and mix until smooth

3 Apply into joints using a rubber float

4 Wipe off excess with a damp sponge within 30 minutes
